

COMMON QUESTIONS

Will I have enough food for my guests?

We at Virginia Barbeque know that you do not want to be surprised with more guests than food when serving your event. Our service comes with extras over what is normally needed to feed the guest count you have provided. For instance we give you 5 ounces of Barbeque per guest to insure extra is available for those hungry eaters. Our salads are portioned to give you 3 ounces per guest, with several choices on your menu your guests will definatly be full!

When do I need to place my catering order? Can I change the guest count if needed?

We can handle most events right up to the date you need to pick them up! Exceptions to this will be high volume dates and large events. We recommend securing your event as soon as you know your need, but remember we can handle your last minute needs. We can add to your count up until pick up time. Please give plenty of notice if your count is lower than expected so that we can adjust the items we need to order for your event.
